

ProSlate™. Modern speech generating devices built on the Apple iOS platform.

The ComLink ProSlate™ Series is a line of light weight, sleek and stylish AAC devices available in a variety of sizes and exciting colors. The iOS based devices are capable of handling all of your communication needs by leveraging the latest and greatest AAC apps. With a rugged design and backed by the best warranty available in the industry, you can rest assured that you will enjoy your ProSlate™ for years to come.

Industry BEST Warranty

When you choose a dedicated ProSlate™, we'll include a 1 Year Worry-Free Warranty to protect you against all types of damages that may occur. This means no more down time waiting for funding for repairs.

Patent Pending FlexABLE® Handle and Stand

Included with each device, the FlexABLE handle and stand is an ergonomic innovation that solves positioning and handling. Regardless of the level of dexterity, the patent pending design provides infinite angle adjustment.

SnapLock™ Keyguards

The ProSlate™ Series has a variety of keyguards available to support different layouts and button densities. The sleek design without hinges or straps to break or wear out is easily interchangeable. With

the soft-to-the-touch edges, the quarter inch thick keyguards prevent touching of unwanted selections.

The wearable SoundPOD™ Speaker Module

Now voice output can come directly from the person rather than the device! The SoundPOD™ magnetically docks to the back of the device and can also be removed and attached to the neck lanyard and worn by the user. Unlike traditional AAC device design, a

SoundPOD™ user's voice comes from their neck area and can be concealed under clothing resulting in the communication partner looking at the face of the AAC user.

Front and rear facing cameras

With front and rear facing cameras, you can quickly shoot photos of rooms, objects and people. Photos can quickly be placed on vocabulary cells or used for Visual Scene Displays, extremely useful for clients with Aphasia.

Wireless switch access

Access the ProSlates' applications using ability switches such as Buddy Buttons, Leaf switches, sip and puff switches and more.

Choose your AAC app

When you order your ProSlate™, we'll pre-load the AAC software of choice the most requested apps.

Better for accessibility

The ProSlate 13 has all the advantages of the ProSlate series with the obvious difference being size. The bigger format rewards users with larger icons or targets overcoming accessibility issues. This is very beneficial with apps such as CoughDrop or Speak for Yourself. Ask one of our Assistive Technology Specialists for a demonstration of the ProSlate 13 today.
